WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Nevada Tahoe Regional Planning Agency Governing Board,

[Heidi Hill-Drum](#) has apparently been [submitting](#) "staff report" articles for the Tahoe Daily Tribune, that consists of propaganda and false statements. The Tribune, a substantive public relations (PR) enterprise for most [Tahoe Chamber of Commerce interests](#), has a list of guest columnists, anonymous "Staff Reporters," and "Sponsored Content Providers" who provide advertisement material disguised as news—all of whom are advancing political agendas, and none of whom are employed by the newspaper.

She submits one of her [fake news articles](#) every other month or so—sometimes even one [per week](#)! In one egregious episode of this, the Tahoe Prosperity Center (TPC) [took credit for experimental technology](#) developed [decades ago](#) by the University of California-San Diego under [NSF Grant\(s\)](#), and long deployed to cover the Cleveland, San Bernardino, and Angeles National Forests—[HPWREN](#). Having failed at requisite globally important research, the somewhat disgraced Dr. Graham M. Kent packed up his ocean front office at [Scripps](#) (UCSD) and moved to Reno where the tenure standards are frankly lower—to pursue subjective public safety research.

Hedi had [Mr. Kent falsely testify](#) that the "Angel's Roost" [fiber-optically wired cameras](#) needed a macro cell tower at Ski Run Boulevard in order to communicate with the world. Dr. Kent depends on Heidi for funding, and after having fallen on hard times, is clearly for sale. Full UCSD Professors [Beatrice Golomb, MD, PhD](#) and [David Whelan, PhD](#) would both differ on Kent's baseless opinion that

radiofrequency radiation has no [health](#) or environmental effects. UC Berkeley Professor [Joel Moskowitz](#) joins this consensus, and even [weighed-in on the Tahoe debate](#). If that somehow weren't enough, add Stanford Professor [David A. Relman, MD](#).

The camera technology tries to replicate 1970's lookout towers, long made obsolete by heavy human presence and by [satellite remote sensing](#). The Forest Service stopped even having volunteers staff lookout facilities around urbanized areas. There are already cameras on many of the peaks, and there is a lot less value than hyped added by "Alert Tahoe." This camera money would have been better spent on getting rapid-response fire aviation resources permanently based at [our large airport](#).

Without notice of authorship to anyone, the TPC had published a Tribune "[staff report](#)" falsely claiming to have been "the first" to deploy this technology of vastly overstated importance. So why this article, and why now? Well, it is a timed PR stunt, used to suppress the due diligent questioning of this organization's unethical behavior, at a time when it thirsts for more power.

You can read this public comment's enclosed evidence (double-click if presented as attachments) to discover the cozy relationship the TPC has with the Tahoe Chamber of Commerce and the Lake Tahoe Visitor's Authority (LTVA). They all share the same office space and represent the same interests. Indeed their economic plan—is really [Tahoe Chamber CEO Steve Teshara's plan](#) (that's from his website). **This economic plan is a cooked-up political opinion**, enshrouded in a bunch of stilted economic jargon—and the public was not invited to the table by design. [They don't want low-income housing built in Nevada](#), they don't want their businesses to have to [pay their employees more](#). They want California to subsidize all of their [exploited employee's](#) needs. As you'll see, I have **deep sources**.

Word.

11 Pathway to cyber security: The Morgan Family Foundation has a link to a company in the Bay Area and we have recently begun facilitating a conversation for a pathway with LTCC's new Cyber program. Retention of the students in this program is important for our community, so we'll ensure the pathway keeps workers here.

Meeting adjourned at approximately 12:10

TAHOE PROSPERITY CENTER

Board Retreat – July 13, 2018

Draft Meeting Summary

Tahoe Chamber Conference Room, 169 Highway 50, Stateline, NV

DRAFT SUMMARY

Action Items

- Lead a special initiative to recruit a specific economic sector: white hat hackers and other hi-tech digital nomads (B. Stern)
- Next steps for board structure and management (Hill Drum with Executive Committee)
 - Identify a chair for each board subcommittee/working group and establish a schedule of meetings
 - Develop simple draft work plans for 2019 for board review in fall 2018
- Schedule an additional board workshop to focus on board structure, roles, responsibility and participation (Hill Drum and J. Walker)
- The Housing Tahoe subcommittee will meet to finalize next steps on Housing Tahoe (B. Roby)
- Collect and collate housing and workforce assessments, including recent TRPA and other reports (Hill Drum)

Overview

The board met with the following goals for the meeting:

- Develop specific goals for program areas for 2018 and 2019
- Compare organizational goals, needs and the skills, interest and experience of board members
- Energize the board and staff to make great gains in 2018-2019!

The majority of the workshop focused on identifying goals for 2018-2019 for housing, workforce, fundraising and the Economic Summit. Broad goals were identified for each category, along with some specific next steps, though additional work is needed to develop measurable objectives and a work plan. Key goals for the next year included:

- Housing: Conduct/complete an assessment of housing needs in the South Shore
- Workforce: Assess north shore workforce needs; convene Tahoe area colleges to coordinate on training programs and regional resources
- Fundraising: Work toward 100% board participation in fundraising
- Economic Summit: Become revenue generator for TPC

The group began discussion of board roles and board development but this discussion was abbreviated due to lack of time. The goals for next discussions with the board are to:

- Develop a strategy for board participation in fundraising
- Match board member interests, experience, and capacity to TPC needs
- Update membership, roles and work plans for working groups/subcommittees

Board of Directors Meeting
December 13, 2019, LTVA/Tahoe Chamber

Meeting started at 9:36 AM

Board members present: Frank Gerdeman, Lisa Granahan, Michelle Risdon, Brian Hogan, Roger Kahn, Rick Link, Joanne Marchetta, Jesse Walker, Bill Kelly, Roger Rempfer, Bob Grant

Board members on phone: Bill Roby, Robert Stern

Staff Present: Heidi Hill Drum, Chase Janvrin, Erin Jones, Shelby Cook

Rick Lind welcomed the board:

- We're the strongest we have ever been financially.
- This year we had a comprehensive management consultant, B, evaluate the CEO and board and we have received helpful feedback.
 - Will begin implementing the recommendations in the next few months.

Group introduced themselves to new Board Member Bill Kelly.

Action Item: Bill Kelly Board membership

Brian Hogan motions, Roger Kahn seconds, board unanimously approves.

Action Item: To approve board members leaving:

Andy Chapman, Cindy Gustafson, Jane Layton and Bob Mecay

Roger Rempfer moves, Bob Stern seconds, board unanimously approves.

Consent Agenda to approve new officers, board terms, financials and meeting minutes:

Roger Rempfer moves, Frank Gerdeman seconds, board unanimously approves.

Brain Hogan & Heidi Hill Drum lead 2020 Budget:

- *Bill Kelly moved, Jesse Walker seconds, board unanimously approved 2020 budget.*

Board and Committee Meeting Changes:

Shift from fourth Friday mornings, to **first Wednesday afternoons from 3-5 PM** at various businesses around the lake and then follow it with a happy hour.

Moving forward:

- Get agendas out to committees prior to meetings so they can gauge what their involvement needs to be/prepare.
- We should bring in not only community members, but people who can come in and present on their accomplishments in the fields that we're working on to make this a learning experience.
- TPC to be clearer about dates and times for committee meetings.
- Committee chairs and TPC to set meetings for when they make sense.

2020 board calendar: Joanne Marchetta moved, Roger Rempfer seconds, board unanimously approves.

Action Items:

- Make an updated organization chart (*Heidi*)
- Keep reminding and getting on the board to engage for the Summit. (*Roger Rempfer*)
- Send updated calendar invites for next year. (*Shelby*)
- Send out an ask to the board about what committees they want to be on. (*Shelby*)
- Consider a possible new committee: to discuss with workforce at their meeting and bring back to board next meeting. (*Workforce and Executive Committees*)

Meeting ended at approximately 11:24 AM

Board Retreat - July 26, 2019

Edgewood Tahoe

Stateline, NV 89449

Board Members Present: Andy Chapman, Darcie Collins, Lew Feldman, Lisa Granahan, Roger Kahn, Jane Layton, Rick Lind, Joanne Marchetta, Jennifer Merchant, Devin Middlebrook, Sue Novasel, Roger Rempfer, Patrick Rhamey, Michelle Risdon, Bill Roby, Robert Stern, Jesse Walker and Frank Gerdeman.

Staff Present: Heidi Hill Drum, Erin Jones, Shelby Cook

Facilitator: Tawni Janvrin

Meeting began at 8:38am.

Chair Bill Roby welcomed the board:

"When it comes to people and individual's desire for the Lake Tahoe area, there is always one word: thrive. That is the purpose of our work here today - guiding this organization so that we can build a community that thrives."

Heidi led a high-level overview of what TPC has accomplished over the past five years. She also shared an overview of the 2018-2020 Strategic Plan, the 2019 Workplan and Q2 updates.

Specific Strategic Plan accomplishments at the halfway point of the three-year plan:

There are 28 objectives set by the board.

- 12 (43%) are completed.
- 5 of the 28 are halfway toward completion.
- 6 are ongoing.
- 3 are being led by others.
- 2 have yet to begin.

We're on track to complete most of the original Strategic Plan objectives by the end of 2020.

Heidi then introduced Tawni Janvrin, our facilitator for the day. She shared that she has excellent facilitation and corporate retreat experience and is helping with planning for the Tahoe Economic Summit.

Evolutionary Stage of a Board of Directors - this section was led by Bill Roby

How a board evolves affects how an organization evolves.

Growth/evolution usually happen due to a catalyst which pushes a board out of their comfort zone. There are four types of boards: Working, Governance, Strategic, and Visionary

- TPC tends to bounce around between each of these, the two most prominent being Working and Governance.

There are visionary aspects in each step of the board evolution; we can't be in a visionary stage yet as we're still reaching toward our original vision.

- The board at this point in development needs to be strategic and focused on accomplishing particular goals.

The agreement provides for the National Laboratory for Applied Networking Research (NLANR)'s Measurement and Operations Analysis Team (MOAT), led by Principal Investigator Hans-Werner Braun, to continue the NLANR research activities that have been ongoing at UCSD since 1995. In addition to measuring and analyzing vBNS traffic data, NLANR/MOAT will promote the continued development, testing and deployment of publicly-available measurement and analysis tools and techniques. NLANR/MOAT will facilitate the early identification and analysis of performance (both network-centric and applications-centric) trends and problems (related to the VBNS and interconnected High Performance networks and institutions). This will be accomplished by deploying flow monitors and conducting performance measurements on HPC connections to the vBNS, on select vBNS partner nodes, and at other key sites (particularly vBNS aggregation points, such as GigaPOPs and NGIXen). Resulting data and analysis on Internet traffic performance and traffic flows will then be made available to the research community and the general public.

ABSTRACT

This proposal was submitted to NSF in response to the ITR solicitation NSF 04-012. This proposal is follow-on to an existing award: 0087344. This project will conduct systemic interdisciplinary and multi-institutional research regarding the quality of service achievable by a highly functional wireless cyberinfrastructure environment. While doing so, it addresses several diverse scientific networking predictability needs for rural and remote areas.

An unresolved and underdeveloped area for the evolving Internet is the issue of ubiquity. Rural areas across the nation are affected by the lack of network access; solutions are either prohibitively expensive, or many years away from implementation. The research and education communities have immediate connection needs, for researchers working in remote areas (in the field, in observatories, and with autonomous telemetry sensors) and for remote educational facilities, at reasonable performance levels to

the Internet.

The goal of this project is to create a substantial and robust wireless backbone network for bidirectional traffic flows by expanding upon a prototype connection recently installed by the Measurement and Network Analysis Group of the National Laboratory for Applied Network Research (NLNR) and the San Diego Supercomputer Center (SDSC), the Scripps Institution of Oceanography (SIO), as well as the School of Engineering and its Center for Wireless Communications (CWC).

This proposal is a collaboration between network researchers and disciplinary researchers in geophysics, and other fields. Multiple different users with different impacts will help to define and understand requirements, as well as appropriate parameters for the implementation of a high performance wireless networking environment, with high performance extending beyond raw speed and including aspects of predictability, as well as spacial and temporal availability. The project is heavily leveraged with the existing network measurement and analysis activity of NLNR, as well as the seismic measurement and analysis activities at SIO.

The immediate impact of providing services to researchers and telemetry stations in the field and a delivery mechanism for distance education in disadvantaged areas (in San Diego County) is clear. This network will have the technological capability to accommodate a high volume of data (for both communications and telemetry), thus increasing the scope and area of many projects currently limited by these constraints. The wireless network's primary function as an applied test bed to address distance access issues over a

relatively large rural area in general, and to assess performance characteristics of such a network will result in long-term developments and advances in the area of Internet technology.

The impact of this Internet Technologies project will be substantial and wide-spread. Benefits to the research and education communities - and ultimately, the public - include improved functional capabilities (across a variety of disciplines), facilitated collaborations between institutions, better and more reliable network access, and a prototype which can be emulated throughout rural areas in the U.S.

20) Information on other consulting parties' role or interest (optional):

Early Archaic (5000-2000 B.C.) sites are characterized by projectile points, atlatls and darts, knives, bone awls and ornaments. Lack of grinding tools suggests that the inhabitants were not exploiting the plant foods to the extent that later cultures were. They were nomadic hunters, following the game throughout the seasons. Archaeological sites representing this early period are scarce.

Middle Archaic (about 2000 B.C. to 500 A.D.) represents a long period of time characterized by the utilization of a wide variety of resources. They relied primarily on large game and rabbits, but grinding stones are common at sites. Trade in marine shells and obsidian became important.

Late Archaic (A.D. 500 to Historic Contact) saw a more semi-sedentary settlement pattern. Smaller projectile points suggest the introduction of the bow and arrow and less or no reliance on the spear thrower. Plant processing tools became more abundant, indicating increased dependence on plants and small game, rather than large game.

Washoe

Historically, the Lake Tahoe area was part of the territory occupied by the Washoe Native American group, who are members of the Hokan linguistic group, and are classified as Great Basin Indians. The name “washoe” is derived from the autonym *waashiw*, meaning “people from here” in the Washoe language. The Washoe occupied land throughout California and Nevada, including the Sierra Nevada Mountain range. They were the first known Lake Tahoe region inhabitants. Their settlement pattern included permanent locations on higher ground, near rivers and springs, while temporary camps were utilized anywhere in valleys or mountains, close to food sources (D’Azevedo 1986).

The Washoe utilized seasonal resources available in the region. The area of Lake Tahoe and surrounding rivers and streams were important resources for fishing during the spring and fall, with the higher elevations of the Sierra Nevada utilized for hunting game during the summer. During the winter months stored foods including dried meat and fish and nuts were utilized. Important food resources would have been cattail seeds and shoots, and pinon nuts, as well as a variety of berries, seeds, and roots. Protein would have been provided by hunting game, small mammals, birds, and fishing (Washoe Tribe of Nevada and California 2009).

Establishment of APE and Cultural Resources Within

On August 17, 2018, HELIX Professional Archaeologist Carrie D. Wills, M.A., RPA, visited the candidate location for the purpose of establishing the APE (see Exhibit 1 and Exhibit 2). Ms. Wills satisfies the Secretary of the Interior’s qualifications for a field archaeologist (see Resume). The APE was ascertained by examining the planned candidate construction methods, the existing topography, and the current level of urbanization. Verizon Wireless proposes the construction of a new unmanned tower telecommunications facility at this location. Proposed is the installation of antennas and associated equipment on a new 112’-high monopine within a 30’ by 30’ lease area. A proposed 5’ wide joint utility easement will extend approximately 165’ southeast, southwest, and northwest from an existing utility pole to the lease area. Access will be provided with a proposed 12’-wide access road that will extend southeast from the proposed lease area for approximately 15’ to Needle Peak Road. Approximately 13 trees will be removed to accommodate the APE-DE. The APE-DE totals approximately 0.04 acres.. The visual indirect APE is considered all that area within a ½-mile radius of those portions of the candidate once completed.

Direct APE Cultural Resources

The results of the site investigation confirm no prehistoric cultural resources will be affected by installation of the new monopine telecommunications facility. The candidate location is a pine tree grove within the grounds of Hansen’s Snow Tube and Saucer Hill Resort. A pedestrian survey of all areas of proposed ground disturbance did

Details: The Eastern Shoshone Tribe has established a new online procedure for FCC TCNS review/consultation. Online submissions can now be completed at <http://app.tribal106.com>. The data platform is currently being administered by a third party who are providing consultation servicing through the online system on behalf of the Eastern Shoshone Tribe. For questions, please call Shastelle Swan at 406-395-4700

Based on the location of the proposed project and the pole(s) that you will be constructing as part of the Section 106 process in our particular aboriginal homelands, we are REQUESTING TO BE CONSULTED on this proposed project.

Please utilize the Tribal 106 NHPA consultation processing system website. Online submissions can be completed at <http://app.tribal106.com>

The Eastern Shoshone Tribe through the Historic Preservation Department has established a fee of \$500.00 per consultation. We are only accepting checks at this time. All checks should be mailed to the following address:

I-Response LLC - EST
PO Box 87
Box Elder, MT 59521

If you have questions, please feel free to contact either Mr. Josh Mann, THPO, at jmann@easternshoshone.org or Shastelle Swan, AR Clerk, at shastelle.swan@iresponse106.com.

Sincerely,
Josh Mann, THPO
Eastern Shoshone Tribe

2. THPO Darrel Cruz - Washoe Tribe of Nevada & California - 919 Highway 395 South Gardnerville, NV - darrel.cruz@washoetribe.us - 775-546-3421

If the applicant/tower builder receives no response from the Washoe Tribe of Nevada & California within 30 days after notification through TCNS, the Washoe Tribe of Nevada & California has no interest in participating in pre-construction review for the proposed site. The Applicant/tower builder, however, must immediately notify the Washoe Tribe of Nevada & California in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

Verizon's Unfair and Deceptive Business Practice: Concurrent National Forest Deployment

Unfair and Deceptive Business Practices

Verizon and the Tahoe Prosperity Center deceived City of South Lake Tahoe elected leaders, officials, staff, and residents into believing it was too burdensome to deploy towers in the adjacent National Forest lands, while simultaneously using existing special use permits to "fast-track" cell tower deployments and side-step non-discretionary environmental review of which they had feigned as onerous. This constitutes Unfair and Deceptive Business Practices.

(See Business & Professions Code §§ 17200 *et seq.*):
