Subject: Agenda Request for June SLUPAC Meeting

Mr. Donohue,

My name is Rhiannon Scanlon, and I am reaching out on behalf of rPlus Hydro. We are a renewable energy company developing a 1000-megawatt pumped storage hydro project in White Pine County. The project represents a unique energy storage and supply opportunity for Nevada and will serve as a critical element of the region's modernized and reliable energy infrastructure. Community benefits from the project include the creation of hundreds of long-term construction and dozens of permanent operation jobs. The project will also provide a considerable increase in tax revenues for the state and local communities. You can learn more about the project, including the final license application submitted to FERC on February 27th, at our website: <https://www.whitepinepumpedstorage.com/>. I have also attached a one-pager about the project and pumped storage technology for your review.

While the project footprint is primarily on BLM lands, we are committed to coordinating with the appropriate state and local agencies. We are interested in a short presentation for the Advisory Council at the next SLUPAC meeting in June. We want to answer questions the Advisory Council may have about the project. Is there a specific request form to get on the agenda? Please let me know if you have any questions – I am happy to chat on the phone.

Respectfully,
Rhiannon
